RE: Site Inspection, Preston Hafen, Windy Project, S/053/071, Washington County, Utah

Date of Inspection: July 16, 2002
Time of Inspection: 3:00 p.m.
Conditions: Cloudy, Windy & Warm
Participants: Preston Hafen, Operator; Rick Rymerson, St. George BLM; Doug Jensen, DOGM

Purpose of Inspection: Site familiarization.

Getting to the site:

The site is located ~1 mile south of the Motoqua Road. The road leading to the site is ~100 feet past the Shivwits Indian Reservation fence. A new road has been constructed into the site. A four-wheel drive vehicle is needed at the present time to access the site. Mr. Preston indicated that if a market was developed, further work might be required to allow for the removal of the rock from the site.

Observations:

Approximately 200 feet of an outcrop at the crest of the ridge has been disturbed at the site. The banded sandstone that forms this crest is the material which is the focus of this permit. The sandstone is dense enough that Mr. Preston's group has been able to cut and polish the rock. This is the product that they are hoping to market from this site. A photo of the site was taken and is attached.

Conclusions and Recommendations:

This site is located on a ridge and there are no environmental concerns. The site will be inspected next time I am in the vicinity.
